1.Create a Master-Detail Relationship between two Custom objects and also create a Roll Up Summary Field to Calculate total number of records.

Solution:

### Step 1: Create Custom Objects

Assuming you have two custom objects, let's call them "College\_C" and "C Department\_C". If you haven't already created these objects, you can do so by going to Setup > Object Manager > Create > Custom Object.

**New Custom Object**

Permissions for this object are disabled for all profiles by default. You can enable object permissions in permission sets or by editing custom profiles. [Tell me more!](#) [Don't show this message again](#)

**Custom Object Definition Edit**

**Custom Object Information**

The singular and plural labels are used in tabs, page layouts, and reports.

Label	college	Example:	Account
Plural Label	colleges	Example:	Accounts

Starts with vowel sound

The Object Name is used when referencing the object via the API.

Object Name	college	Example:	Account
-------------	---------	----------	---------

Description

Context-Sensitive Help Setting

- Open the standard Salesforce.com Help & Training window
- Open a window using a Visualforce page

Content Name

Record Name

Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

# Second custom objects, let's call them "Department\_C"

The screenshot shows the Salesforce Setup interface with the 'Object Manager' tab selected. The main page title is 'New Custom Object'. A message bar at the top indicates that permissions for the object are disabled by default. The 'Custom Object Definition Edit' section contains fields for 'Label' (set to 'department') and 'Plural Label' (set to 'departments'). There is also a checkbox for 'Starts with vowel sound'. Below this, the 'Object Name' field is set to 'department' with an example of 'Account'. A 'Description' text area is empty. Under 'Context-Sensitive Help Setting', the 'Open the standard Salesforce.com Help & Training window' option is selected. The 'Content Name' field is set to 'None'. The 'Enter Record Name Label and Format' section includes a note about record names appearing in various contexts. The 'Record Name' field is set to 'Department Name' with an example of 'Account Name', and the 'Data Type' is set to 'Text'. The 'Optional Features' section contains several checkboxes for enterprise features like reports, activities, and licensing, all of which are currently unchecked. The 'Object Classification' section shows three checked checkboxes: 'Allow Sharing', 'Allow Bulk API Access', and 'Allow Streaming API Access'. The 'Deployment Status' section shows 'Deployed' is selected. The 'Search Status' section has an unchecked checkbox for 'Allow Search'. The 'Object Creation Options' section has two unchecked checkboxes: 'Add Notes and Attachments related list to default page layout' and 'Launch New Custom Tab Wizard after saving this custom object'. At the bottom of the page are 'Save', 'Save & New', and 'Cancel' buttons.

## Step 2: Create a Master-Detail Relationship

To create a Master-Detail relationship between these two custom objects, follow these steps:

1. Go to Setup > Object Manager.
2. Click on "College\_\_c" to open its settings.
3. In the left sidebar, click on "Fields & Relationships."

- 4.Click the "New" button to create a new custom field.
- 5.Choose "Master-Detail Relationship" as the data type.
- 6.Enter a label for the relationship, e.g., "Department \_\_c."
- 7.Choose " Department\_\_c" as the related object.
- 8.Configure other settings as needed and click "Next."
- 9.Specify the field-level security and add it to relevant page layouts.
10. Click "Next" and "Save" to create the relationship.

The screenshot shows the Salesforce Setup interface for creating a new custom field. The left sidebar lists various setup categories. The main area is titled "CDepartment New Custom Field" and is on "Step 1. Choose the field type". It shows a list of data types: None Selected, Auto Number, Formula, Roll-Up Summary, Lookup Relationship, Master-Detail Relationship, and External Lookup Relationship. Each type has a detailed description below it. Navigation buttons at the bottom include Next and Cancel.

## Step 3: Create the Roll-Up Summary Field

**Now, let's create a Roll-Up Summary Field on the "College\_C" to calculate the total number of related records in "Department\_C":**

1. Still on the "College\_c" settings, go to "Fields & Relationships."

- 2. Click the "New" button to create a new custom field.**
- 3. Choose "Roll-Up Summary" as the data type.**
- 4. Enter a label for the field, e.g.,**
- 5. Choose "Count" as the Roll-Up Type.**
- 6. Select "Department\_\_c" as the object to roll up information from.**
- 7. Specify the filter criteria if you want to filter the related records.**
- 8. Configure other settings as needed and click "Next."**
- 9. Specify the field-level security and add it to relevant page layouts.**
- 10. Click "Next" and "Save" to create the Roll-Up Summary Field.**

The screenshot shows the Salesforce Setup interface under the 'Tabs' section. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. A search bar at the top right contains the text 'Search Setup'. Below the navigation, there's a sidebar with a search field 'Q\_ tabs' and sections for 'User Interface' (including 'Rename Tabs and Labels' and 'Tabs'), and a message 'Didn't find what you're looking for? Try using Global Search.' The main content area is titled 'Custom Tabs' and contains sections for 'Custom Object Tabs', 'Web Tabs', 'Visualforce Tabs', 'Lightning Component Tabs', and 'Lightning Page Tabs'. Each section has a 'New' button and a 'What Is This?' link. Under 'Custom Object Tabs', there is a table:

**New Custom Field**

**Step 1. Choose the field type**

**Step 1**

Specify the type of information that the custom field will contain.

**Data Type**

None Selected Select one of the data types below

Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

Formula A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

Roll-Up Summary A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Master-Detail Relationship Creates a master-detail relationship between this object (the child, or "detail") and another object (the parent, or "master") where:
 

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

External Lookup Relationship Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

True/False Allows users to select a True (checked) or False (unchecked) value.

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

2. If there is 2 user, User A and User B in the organisation and we want in Account object that User A should not see the User B Record and user B should not see User A record then apply the Security for the users.

Solution:

Step 1: Create two separate custom profiles, one for User A and one for User B.

The screenshot shows the Salesforce Setup interface with the 'Profiles' page selected. The left sidebar includes links for Setup Home, Service Setup Assistant, Multi-Factor Authentication Assistant, Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lighting Usage, Optimizer, Administration, Users, Permission Set Groups, Permission Sets, and Profiles. The 'Profiles' section is currently active. The main content area displays a table of profiles with columns for Action, Profile Name, User License, and Custom. The table lists various profiles such as Analytics Cloud Integration User, Analytics Cloud Security User, Authenticated Website, Chatter External User, Chatter Free User, Chatter Moderator User, Contract Manager, Cross Org Data Proxy User, Custom Marketing Profile, Custom Sales Profile, Custom Support Profile, Customer Community Login User, Customer Community Plus Login User, Customer Community Plus User, Customer Community User, and Customer Portal Manager Custom. The 'Custom' column indicates which profiles are custom profiles. The table is paginated at the bottom, showing page 1 of 2.

The screenshot shows the Salesforce Setup interface under the Profiles section. The left sidebar includes options like Setup Home, Service Setup Assistant, Multi-Factor Authentication Assistant, Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage, Optimizer, ADMINISTRATION, and Users (with sub-options: Permission Set Groups, Permission Sets, Profiles, Public Groups, Queues, Roles, User Management Settings, and Users). The main content area displays a table titled "Profiles" with the following data:

Action	Profile Name	User License	Custom

<input type="checkbox"/>	Edit   Clone	Standard Platform User	Salesforce Platform
<input type="checkbox"/>	Edit   Clone	Standard User	Salesforce
<input type="checkbox"/>	Edit   Clone	System Administrator	Salesforce

At the bottom, there are navigation links for "1 of 7" and "0 Selected".

The screenshot shows the "Clone Profile" page in the Salesforce Setup interface. The left sidebar is identical to the previous screenshot. The main content area has a heading "Clone Profile" and a sub-instruction "Enter the name of the new profile." Below this, a note says "You must select an existing profile to clone from." A table provides details about the existing profile being cloned:

Existing Profile	Standard Platform User

The screenshot shows the Salesforce Setup interface with the 'User Management Settings' section selected under 'User'. The 'Users' tab is active. The main content area displays the 'Users' configuration page with sections for 'Mailing Address', 'Single Sign On Information', 'Locale Settings', and 'Approver Settings'. The 'Mailing Address' section includes fields for Street, City, Zip/Postal Code, State/Province, and Country. The 'Single Sign On Information' section has a 'Federation ID' field. The 'Locale Settings' section shows the Time Zone as '(GMT+05:30) India Standard Time (Asia/Kolkata)', Locale as 'English (India)', and Language as 'English'. The 'Approver Settings' section includes fields for 'Delegated Approver' and 'Manager', and a dropdown for 'Receive Approval Request Emails' set to 'Only if I am an approver'. A checkbox for 'Generate new password and notify user immediately' is checked. At the bottom are 'Save', 'Save & New', and 'Cancel' buttons.

## Step 2:

### Permission Sets:

- Create two permission sets, one for User A and one for User B.

### Object-Level Security:

- In each profile and permission set, set the object-level security for the Account object to "Read" to ensure that both User A and User B can view Account records.

### Record-Level Security:

- Implement record-level security using Criteria-Based Sharing Rules.
- Create a sharing rule that shares Account records owned by User A with User A and records owned by User B with user B.
- For the sharing rule criteria, specify that records owned by User A are shared with user A, and records owned by User B are shared with User B.

### Ownership:

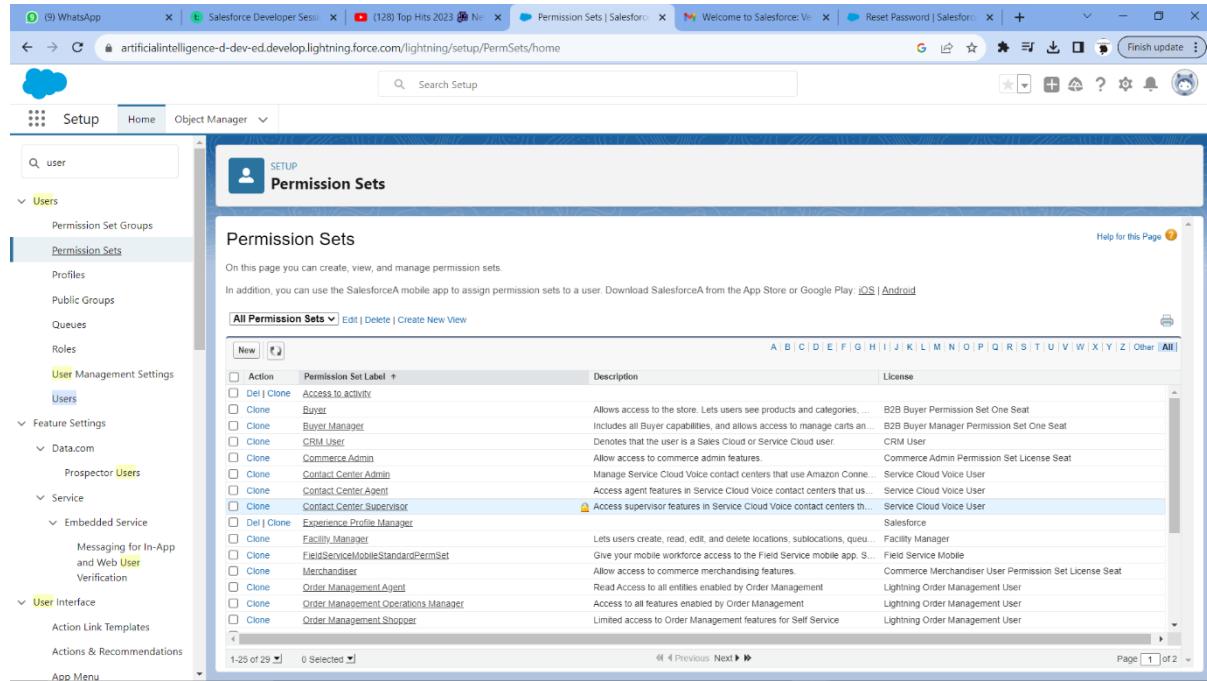

- Ensure that the Account records are owned by the respective users, with User A owning their records and User B owning their records.

## Organization-Wide Defaults:

- Set the organization-wide defaults for the Account object to "Private" to ensure that records are private by default.

## Testing:

- Test the setup by logging in as User A and User B separately to verify that they cannot access each other's records.

The screenshot shows the Salesforce Setup interface with the 'Permission Sets' page open. The left sidebar is collapsed, and the main content area displays a table of permission sets. The table columns are 'Action', 'Permission Set Label +', 'Description', and 'License'. The 'Description' column contains detailed explanations for each permission set, such as 'Allows access to the store. Lets users see products and categories, ...' for 'Access\_to\_Activity'. The 'License' column indicates which license is required for each set, such as 'B2B Buyer Permission Set One Seat' for 'Access\_to\_Activity'. The table includes links for 'New', 'Edit', 'Delete', and 'Create New View'. At the bottom, there are navigation links for 'Previous' and 'Next' pages, and a note indicating '1-25 of 29' results.

The screenshot shows the Salesforce Setup interface with the 'Permission Sets' tab selected. On the left, the navigation sidebar is open, showing categories like 'Users', 'Feature Settings', 'Data.com', 'Service', 'User Interface', and 'App Menu'. The 'Users' section is expanded, showing sub-options such as 'User Management Settings' and 'Prospector Users'. The main content area displays the 'Create Permission Set' form. The 'Enter permission set information' section requires the 'Label' (set to 'user') and 'API Name' (set to 'user'). The 'Description' field is empty. The 'Session Activation Required' checkbox is unchecked. The 'Select the type of users who will use this permission set' section includes a note about who will use the permission set ('None') and options for assigning it to multiple users or specific user or permission set licenses. The 'License' dropdown is set to '-None-'.

This screenshot is identical to the one above, except the 'Label' field now contains 'salesmanager' and the 'API Name' field also contains 'salesmanager'. All other fields and settings remain the same as in the first screenshot.

## Step 7:

Now to give the specific delete access to the user click on edit on the Account and then enable the read,create,edit and the delete on it so that the permission set will have a specific special access on it. once it has been done click on save and then click on manage assignment.

The screenshots illustrate the configuration of a Permission Set in the Salesforce Setup. The permission set, named 'permission12', is applied to the 'Accounts' object. In the 'Object Permissions' section, the 'Delete' permission is initially unchecked. After being checked, the changes are saved. The 'Field Permissions' section shows standard field access levels.

Object	Permission Name	Enabled
Accounts	Read	<input type="checkbox"/>
	Create	<input type="checkbox"/>
	Edit	<input type="checkbox"/>
	Delete	<input checked="" type="checkbox"/>
	View All	<input type="checkbox"/>

Account Owner	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Account Site	<input type="checkbox"/>	<input type="checkbox"/>
Account Source	<input type="checkbox"/>	<input type="checkbox"/>

## Step 8

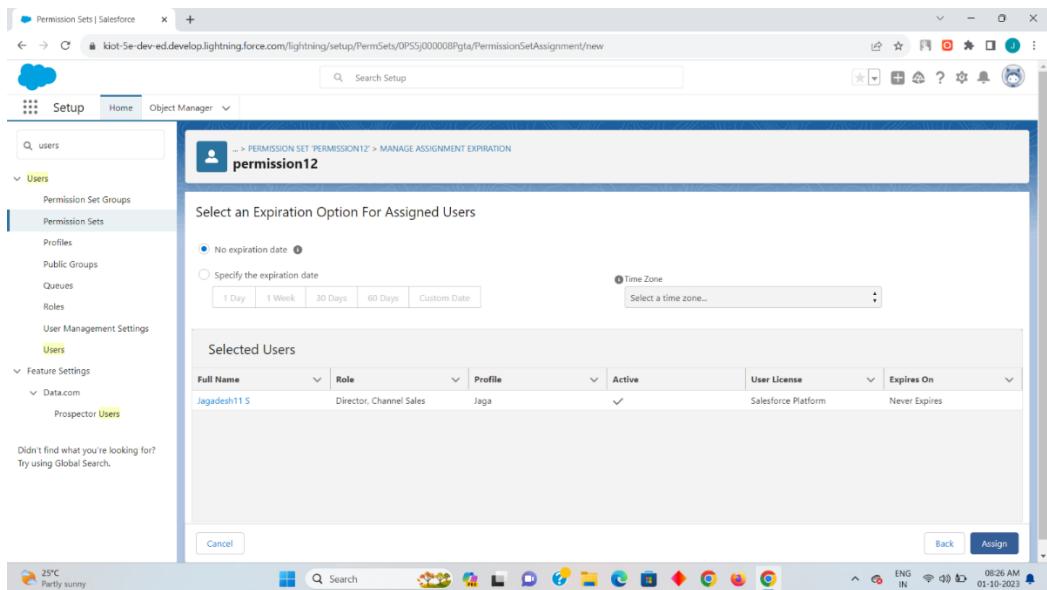

Now click on add assignment there you will find your two created users click on any one user to give a special access as delete on it and then click on assign so that the specific selected user can have a special access as delete on it.

The screenshot shows the 'Permission Sets | Salesforce' page. The left sidebar is expanded, showing 'Users' under 'Permission Set Groups'. The main content area is titled 'permission12' and shows the 'Current Assignments' section. It features a decorative illustration of a cactus, sun, and clouds. Below the illustration, a message says 'No assignments defined.' A small note at the bottom left says 'Didn't find what you're looking for? Try using Global Search.'

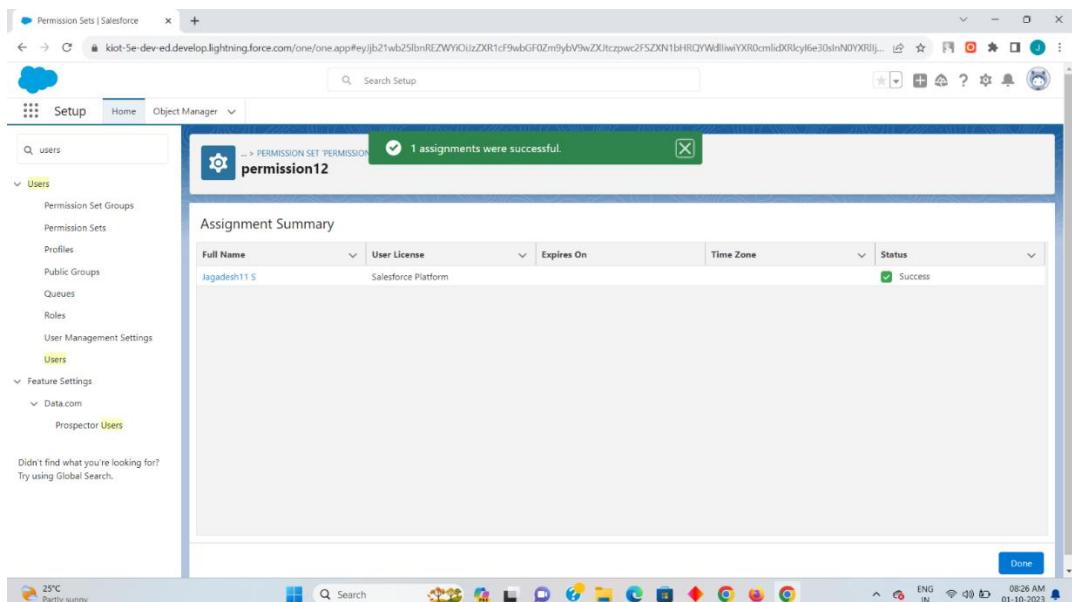

This screenshot shows the 'PERMISSION SET permission12 > MANAGE ASSIGNMENT EXPIRATION' dialog. The title bar says 'PERMISSION SET permission12 > MANAGE ASSIGNMENT EXPIRATION'. The main area is titled 'Select Users to Assign' and shows a table of users. A search bar at the top right contains 'jagadesh'. A tooltip above the search bar says 'Roles, Alias, and Profile aren't searchable. Use filters or sort on these fields instead.' The table has columns: Full Name, Alias, Username, Role, Active, and Profile. One row is selected, showing 'Jagadesh S' with 'Active' checked. Other users listed include 'jagadesh11 S', 'jagadesh22 S', and 'jaat1@gmail.com'. A 'Next' button is visible at the bottom right.

This screenshot shows the same 'PERMISSION SET permission12 > MANAGE ASSIGNMENT EXPIRATION' dialog. The 'All Users' dropdown is open, and the search bar still contains 'jagadesh'. The table now shows four rows, all with the 'Active' checkbox checked. The users are 'Jagadesh S', 'Jagadesh S', 'Jagadesh11 S', and 'Jagadesh22 S'. The 'Next' button is visible at the bottom right.

Click on next.

Now click on Assign.

Now the specific access for the Jagadesh11 user has been assigned successfully.

4.Create a screen flow for a basic survey to fill in the details for any form.

Solution:

#### Step 1: Create a Custom Object

The next step is to create a custom object **Survey Result** and a few custom fields to store survey responses.

1. Click **Setup**.
2. In the Object Manager, click **Create | Custom Object**.
3. Now create a custom object **Survey Result** and fields as shown in the screenshot below:
4. Click **Save**.

## Step 2: Create a Thank You For Survey Lightning Email Template

1. Click **App Launcher**.
2. In the Quick Find box, type **Email Templates**.
3. Clicks on the **New Email template** button.
4. Name the **Lightning Email Template** and make sure to store it in the **Public Email Templates** folder.
5. Create a template like the following screenshot.

Email Template

**Step 4.1: Salesforce Flow — Create a Screen that Allow Users to Fill Survey**

- 1. Click Setup.**

2. In the Quick Find box, type **Flows**.
3. Select **Flows** then click on the **New Flow**.
4. Select the **Screen Flow** option and click on **Next** and configure the flow as follows:
  1. **How do you want to start building:** **Freeform**
5. We will use the **Screen** element to capture a **Survey response** form. Drag and drop a **Screen** element onto the canvas.

## Step 4.2: Salesforce Flow — Add a Record Creates Element to Save Survey Response

1. Drag-and-drop the **Create Records** element onto the Flow designer.
2. Enter a name in the **Label (Save Response)** field; the **API Name** will auto-populate.
3. For **How Many Records to Create** – select **One**.

## Step 4.3: Salesforce Flow — Call an Action — Email Alert to Send Out Thank You Email

The next step is to call the **Survey – Thank You Email** email alert from flow so that when flow fires it triggers the thank you email to survey participants.

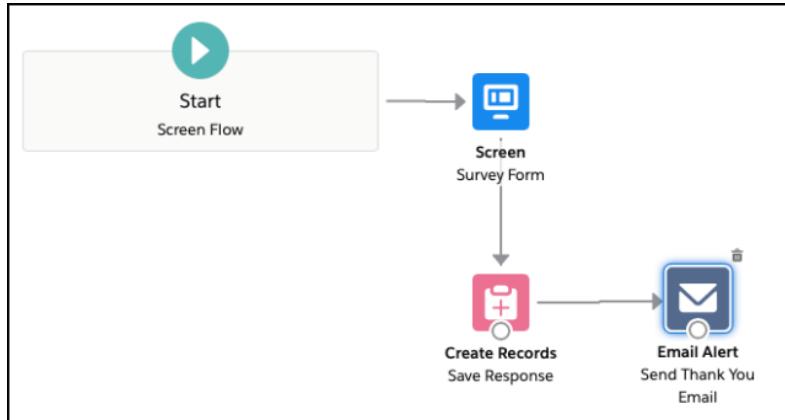

- 1.Under **Toolbox**, select **Element**.
- 2.Drag-and-drop **Action** element onto the Flow designer.
- 3.In the **Action** box, type **Survey – Thank You Email**.

## 4. Clicks on the Survey – Thank You Email email alert.

### 5. Click Done.

In the end, Sergio's Flow will look like the following screenshot:

The screenshot shows the 'Save as' dialog for a new flow. The 'A New Version' button is highlighted. The 'Flow Label' and 'Flow API Name' both have the value 'Survey'. The 'Description' field is empty. Under 'How to Run the Flow', the dropdown shows 'User or System Context—Depends on How Flow is Launched'. The 'Type' is set to 'Screen Flow' and the 'API Version for Running the Flow' is '51'. In the 'Interview Label' section, there is a search bar with 'Survey {!\$Flow.CurrentDateTime}' entered. The 'Last Modified' section shows the flow was last modified on 12/21/2020 at 4:54 PM by Rakesh Gupta. The status is 'Active', the type is 'Screen Flow', and the version number is 2. At the bottom, there are 'Cancel' and 'Save' buttons.

## Step 5: Create a Lightning Application to Render Lightning Runtime for Flow in a Visualforce Page

Now we will create a Lightning Application that declares a dependency on the **lightning:flow** component.

1. Click **Setup | Developer Console**
2. Navigate to **File | New | Lightning Application**
3. Enter a **Name (VFPPageToLC)** field, make sure to select the **Lightning Out Dependency App** checkbox.
4. Click **Submit**.
5. Copy code from [\*\*GitHub\*\*](#) and paste it into your Lightning Application.
6. **Save** your code.

The screenshot shows the Salesforce IDE interface. The top menu bar includes File, Edit, Debug, Test, Workspace, Help, and navigation icons. A tab labeled "VFPageToLC.app \*" is active. The main editor area contains the following code:

```
1 <aura:application access="global"
2     extends="ltng:outApp"
3     implements="ltng:allowGuestAccess">
4     <aura:dependency resource="lightning:flow"/>
5 </aura:application>
```

The code defines a Lightning Application component named "VFPageToLC.app". It specifies global access, extends the "ltng:outApp" base component, and implements the "ltng:allowGuestAccess" interface. It also declares a dependency on the "lightning:flow" component.

## Step 6: Create a Visualforce Page and Embed Your Flow Into It

Now we will create a Lightning Application that declares a dependency on the **lightning:flow** component.

Add the Lightning Components for Visualforce JavaScript library to your Visualforce page using the **<apex:includeLightning/>** component. In the Visualforce page, reference the dependency app. Then write a JavaScript function that creates the

# component on the page using **\$Lightning.createComponent()**

1. Click **Setup**.
2. In the Quick Find box, type **Visualforce Pages**.
3. Clicks on the **New** button.
4. Copy code from [GitHub](#) and paste it into your visualforce page
5. Click **Save**.

The screenshot shows the Visualforce Page Editor interface. At the top, there's a header with 'Visualforce Page' and 'Survey'. Below it is a 'Page Edit' toolbar with buttons for 'Save', 'Quick Save', 'Cancel', 'Where is this used?', 'Component Reference', and 'Preview'. A note 'Help for this Page' is visible in the top right. The main area has a 'Page Information' section where 'Label' and 'Name' are set to 'Survey'. It also includes fields for 'Description', 'Available for Lightning Experience, Experience Builder sites, and the mobile app' (with a checked checkbox), and 'Require CSRF protection on GET requests' (with an unchecked checkbox). Below this is a 'Visualforce Markup' tab which contains the following code:

```
<apex:page showheader="false" lightningStylesheets="true">
<html>
<head>
<apex:includeLightning />
<!--Use apex:includeLightning to add the Lightning Components for Visualforce JavaScript library to your Visualforce page-->
</head>
<body class="slds-scope">
<div id="flowContainer" />
<script>
var statusChange = function (event) {
    if(event.getParam("status") === "FINISHED") {
        var outputVariables = event.getParam("outputVariables");
        var key;
        for(key in outputVariables) {
            if(outputVariables[key].name === "myOutput") {
                // Your logic here
            }
        }
    }
};
$Lightning.use("c:VFFPageToLC", function() {
    $Lightning.createComponent("lightning:flow", {"onstatuschange":statusChange},
        "flowContainer",
        function (component) {
            component.startFlow("Survey", );
        }
    );
});
</script>
</body>
```

## Step 7: Create a Force.com Site to Open Your Flow for Unauthenticated Access

Now we will create a site to open the flow for unauthenticated access.

1. Click **Setup**.

2. In the Quick Find box, type **Sites**.
3. Clicks on the **New** button.
4. Fill the details as per the screenshot below:
5. Click **Save**.

Hi Alok Sinfal,

Thanks for taking time out to participate in our survey. We are very appreciative of the time you have taken to assist in our analysis, and commit to utilizing the information gained to contemplate and implement worthwhile improvements. We will share these results with you through your State Survey Agency, whom we also thank for their generous participation.

Once again, we are extremely grateful for your contributing your valuable time, your honest information, and your thoughtful suggestions.

Thanks,  
Automation Champion
